RADIATORS

FEATURES & BENEFITS

- Designed as a drop-in replacement to install and perform like the original equipment
- II-aluminum construction improves thermal transfer while reducing weight and eliminating crimps and other failures common to plastic models.
- Designed with side-rail stress relief cuts to reduce stress on the headers and allow thermal expansion.
- Increased tube-wall thickness for durability and longevity.
- Redesigned corner brackets to increase unit durability and improve ease of installation.
- Radiator tubes are high-frequency welded, seamless tubes for strength and durability.
- Every unit is leak- and fit-tested to ensure quality cooling and a proper OE-grade fit.
